

The Coloring Starter Kit

Three little scenes. Three color plans. A moment just for you.

Make a little space for color

1. Choose an outline and print that page at “fit to page”.
2. Test five markers on the swatch sheet. Put scrap paper underneath to protect your table.
3. Start with the lightest color in the largest areas, then add your accents. Your page does not have to match the example.

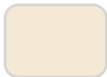

Original AI-assisted illustrations created for this collection. Colored examples are palette inspiration, not a promise of an exact app result.
